

hair

At emmanuel f we use natural, organic, eco-friendly products & practices to deliver professional, creative, high quality results.

Our company is passionate about 'the art of hairdressing' & therefore strive to inspire, train & encourage creative learnings, growth & development within our salon. To increase levels, stylists must achieve certain goals & milestones, maintaining these for consecutive months/ years.

As stylists rise, you will see a small increase in the cost of their services: (shampoo, conditioning, treatments, colour, highlights & straightening) reflective of the investment they have made in their professional development, skill, & education. It is important to note that levels are not the sole determination of talent & skill, as each & every stylist brings their own unique personality & talent to their work & have varying levels of expertise in different techniques & services.
